# MAKINGS

## Makings Release Karōshi

*" Vocals take centre stage in this wall of sound where rock meets electro "*

Makings are a six-piece outfit with a unique sound that weaves between electro, rock & rap. The group had a fruitful 2019 with energetic performances at Whelan's Ones To Watch, Vantastival, Youbloom @ Bloom In The Park and Oakfest. Away from home they toured Germany & UK and were invited back to Lechlade Music Festival 2020 (UK) for a third year running. Notable releases include their debut album 'Cognition' which received a 4/5 review by Mail On Sunday. In February 2019 they followed this up with an EP and a further ten singles were released between then and February 2020.

As the world headed into lockdown, Makings diverted their gigging time into creation time and continued to release almost a song per month throughout 2020 while fitting in a live streamed performance for 'Transmission Online Music Festival' .

In October 2020 the band presents Karōshi, a track where the vocals take centre stage inside a wall of sound that merges rock with electronica.

**Makings are ;**
